## ANNEXURE - IV

### INITIAL INDUCTION PROGRAM

The Talent Transformation team at Wipro grooms campus inductees to help them face the challenges of the corporate world.

A holistic 360 degree approach to training is adopted and helps them hone their fundamental computer skills followed by insights into Wipro businesses, process, technology and behavioral skills.

To understand and appreciate the mindset of the young Wiproites and ensure that the transformation is smooth, the induction program is done by a team of dedicated professionals who have exposure to the academic and corporate sectors alike. Project Readiness Program (PRP) is a 4-stage training program designed to address the basic learning needs of the fresh Wipro recruits.

Fundamental Readiness Program (FRP), the first layer of training runs for 2 weeks followed by Corporate Readiness Program (CRP), Technology Readiness Program (TRP) and Real Life Lab (RLL).

#### FRP

The FRP program consisting of two modules aims at raising the skill set of a B.Sc. / BCA / BCM graduate to a level that would be comparable to an engineering graduate. This program aims to teach the fundamental concepts of programming using C and Data Structures

To enable thorough understanding and know the learning pattern of the young Wiproite an assessment is administered post FRP training. The assessment is online and consists of 50 multiple choice questions. The duration of the assessment is one hour.

#### CRP

The CRP program is focused on making young Wiproite comfortable in a corporate environment. This program starts with a corporate induction.

"IMPACT" a behavioral skills building training program ensures that the fresh Wiproites start feeling at ease in the "corporate world". This activity based behavioral intervention informs the new entrants about the corporate work culture and business etiquette.

#### TRP

The technology training provides critical technical skills required to work on projects allocated to Wipro recruits and prepare to face the demands of the project world. We begin doing this by familiarizing with Wipro's businesses and work environment.

A training called "Software Engineering Practices" exposes the Wiproite to the software development life cycle with special emphasis on the software development practices of Wipro.

## RLL

Before getting into projects, students work in a simulated project environment where they get to appreciate the nuances of working in teams, as well as understand Wipro's software engineering processes. This is a 2-week program focusing on a real life project where the students will apply their learning and experience in the software development life cycle.

Post TRP, students shall take up another online assessment. The online assessment consists of 100 multiple choice questions. The duration of the assessment is two hours. The overall PRP Performance computation gives 30% weight to FRP, 50% weight to TRP scores and 20% weight to RLL scores. In case a WASEian falls short of the required scores the faculty at talent transformation shall devote their time to mentoring and coaching the student. This is done to ensure enriched knowledge and improved understanding of the topic. All the efforts made in this direction are meant for the student to be able to clear a second round of assessments with flying colors.
